## Summary

---

Full-Stack Software Engineer with experience in designing and developing web applications from concept to deployment. Skilled in building end-to-end solutions that emphasize performance, reliability and user experience. Combines analytical thinking and collaborative skills to deliver scalable, reliable and impactful software solutions. Open to relocation and flexible to work from any location based on business requirements.

## Skills

---

**Languages:** Java, JavaScript, TypeScript, Python

**Frontend:** React.js, Next.js, Tailwind CSS, Material UI, Zustand, GSAP, Framer Motion, HTML5, CSS3

**Backend:** Node.js, Express.js, REST APIs, WebSockets, WebRTC, JWT Authentication, Firebase

**AI / GenAI:** Generative AI, LLM Integration, Prompt Engineering

**Databases & Caching:** MongoDB, MySQL, PostgreSQL, Redis

**Tools & Platforms:** Git, GitHub, Postman, Vercel, Render, Docker

**Soft Skills :** Agile Methodologies, Problem Solving, Collaborative Development

## Experience

---

### Digital Cell — HRIT University

Aug 2025 – Dec 2025

*Frontend / UI/UX Contributor*

*On-site*

- Redesigned the Student ERP frontend by building reusable React components and optimizing state management, simplifying complex form workflows and improving the application's maintainability.

## Projects

---

### Zingleee — Privacy-First Communication Platform | [GitHub](#)

Apr. 2026

- Developed a communication platform enabling secure chat, voice and video calls without requiring phone numbers, using unique user IDs for privacy-focused identity management.
- Designed a multi-community discussion platform with admin-controlled membership requests, enabling anonymous participation while maintaining secure access control and an intuitive user experience.
- Tech Stack:** React.js, Node.js, Express.js, MongoDB, Socket.IO, WebRTC, Firebase Authentication, JWT, Tailwind CSS, Framer Motion, Cloudinary, Axios, REST APIs, End-to-End Encryption(TweetNaCl)

### JeevanVriksha — Maternal & Child Healthcare Platform | [GitHub](#)

Jan. 2026

- Designed a rural healthcare platform digitizing maternal and newborn healthcare workflows, enabling ASHA workers to manage patient records, vitals, vaccinations, medicine distribution, and real-time field visits from a unified dashboard.
- Integrated a voice-assisted AI feature, enabling natural-language interaction and contextual assistance for healthcare workers through a multilingual interface.
- Tech Stack:** React.js, Node.js, Express.js, MongoDB, Firebase Authentication, JWT, Tailwind CSS, Google Gemini API, Axios, Recharts, i18next (multilingual), Dexie.js(IndexedDB), QR Code Integration, jsPDF, HTML2Canvas, Framer Motion, REST APIs

### Mobizee — Smart Connected Mobility Platform | [GitHub](#)

Oct. 2025

- Developed an end-to-end smart mobility platform with real-time bus tracking, interactive map navigation and a seat reservation system with wallet integration.
- Implemented NFC-based ticketing, shared ride coordination, and taxi-booking functionalities, complemented by real-time safety features such as panic alerts and live trip tracking.

## Education

---

### Dr. A.P.J. Abdul Kalam Technical University

Uttar Pradesh, India

*B.Tech in Computer Science & Engineering*

*2023 – 2027*
